Art Unit: 2651

1. The IDS has been considered. Chong, Shimatani, and Sasamoto are cited as of interest.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. Claims 15, 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/3/04.
4. Applicant's election with traverse of claims 1-14, 17-27 in the reply filed on 5/3/04 is acknowledged. The traversal is on the ground(s) that the species share features in common and a search would overlap. This is not found persuasive because no evidence of obvious variants has been submitted.

The requirement is still deemed proper and is therefore made FINAL.

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-14,17-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. A single means claim is unduely broad because it covers every conceivable means for achieving the stated purpose whereas the specification discloses only the means known by the inventor. See MPEP 2164.08(a) and In re Hyatt, 218 USPQ 195, 197 (CAFC 1983).
